- Transfer of measuring data to a PC
- Saving of additional data e.g. batch number or supplier's name
- Export to nearly all common file formats
- Management of suppliers' and customers' data
- Generation of delivery notes or invoices

humimeter LogMemorizer 3.0®

Recording - analysing - administration

Database-based PC software for easy recording, analysing and processing of measuring data from device series humimeter, FSA and FS_3

Handling:

Directly after the installation of LogMemorizer 3.0® on your PC, the measuring data saved on your moisture meter can be transferred to the PC. Just connect your device (FSA, FS_3 or humimeter series) to your Windows PC via USB, Ethernet cable or Bluetooth. The data transfer can be started from the PC or from the measuring device.

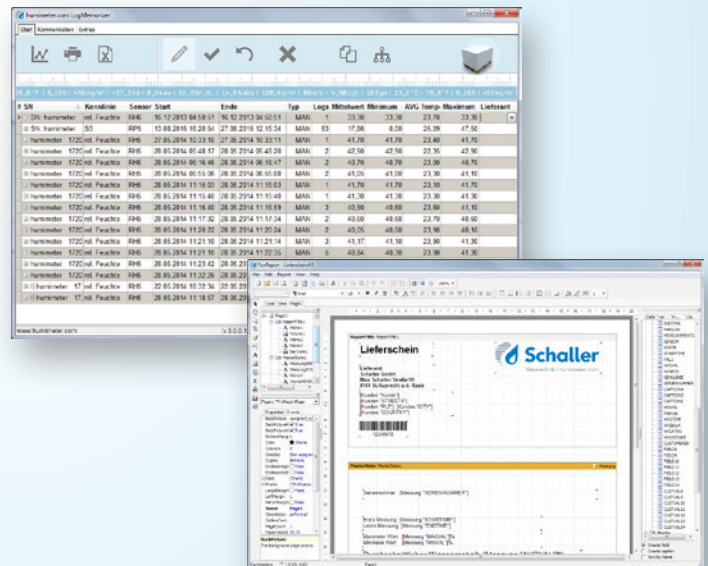

The software offers a variety of editing, management, visualisation and export functions. Create a database of your customers and suppliers and use the convenient export function of invoices and delivery notes. Export templates for invoices, delivery notes, charts and further analysis can be individually created or existing templates can be modified. For that, the system offers a selection of templates.

Among others, the export to the following file formats is possible: *.bmp, *.wmf, *.emf, *.pdf, *.tee, *.xml, *.txt, *.xml, *.htm or *.xls.

Features:

- Database driven system
- Saving and viewing of logs in form of a table or a chart
- Recognition of already saved logs when reading in
- Management of suppliers' and customers' data
- Direct analysis of logs in the program
- Export functions
- Special Excel export function
- Merging of data
- Editing of additional data (batch number etc.)
- Printing of charts without export possible
- Menu languages: English, German, French, Italian and Spanish
